

**PHILIPS**

**CoreLine**

LED range

# “My space, **my solution.**”

The Sparkasse am Brill location of the Sparkasse Bremen AG bank in the German city Bremen is a dynamic hub of banking activities. When the bank decided to outfit its parking facilities with Philips LED, two main objectives were paramount: energy savings and creating a safe environment.

Bank manager Herr Bolte is responsible for the premises' infrastructure. We strive to be an open, accessible and secure partner for our clients. The car park should meet those same requirements. It is one of the gateways into the bank. Bolte: “With the choice for the CoreLine Waterproof LED luminaires, we made

the switch to a solution which provides an energy saving of up to 60%, since the lights in the car park are on 24/7.” What made the investment extra worthwhile was the improvement in lighting quality. Herr Bolte explains, “The new LED luminaires have delivered that, and more: they provide a beautifully natural, white light.”

“**A safe and sustainable place** to park your car, 24 hours a day.”
